Update on China Filing

Carriers have advised us about the following:

Over the past few months we have been confronted with the requirement of early presentation of shipping instructions. This is required because Chinese Customs have made it mandatory for shipping lines to present their complete cargo manifests 24 hours before arrival of the vessel in the port of loading. For this reason the shipping instructions are required 72 hours before arrival of the vessel.

Customs have now informed us that the test period is over and that the rules regarding presentation of the manifest will be strictly upheld. This means that in absence of cargo details, they will exclude cargoes which cannot and will not be loaded by carriers.

In order to comply to these regulations, please make sure to send us your shipping instructions as early as possible. In case shipping instructions are missing at time of container stuffing, we are forced to transfer your cargoes to the next sailing.

ISPM 15 required for exports to Malaysia

Please be informed that the Department of Agriculture in Malaysia will be implementing ISPM 15 for imports, starting 1st of January 2010. Please make sure that wooden packaging materials are treated according to the ISPM 15 requirements. Any wood packaging that does not comply with this standard, may be redirected for treatment or returned to origin.

Transportation of IMO goods to Vancouver 2010

Please note that in the interest of the safety and security of the public and participants in the 2010 Winter Olympics, the transportation of certain dangerous goods in and around the Vancouver / Whistler and surrounding areas will be controlled during the games.

This risk based interim order responds to requirements built on work of the Vancouver 2010 Security Surface Technical Working Group and consultation with Industry and input from Transport Canada. The order establishes twelve controlled access zones where the transport of certain dangerous goods into, through or within a zone are subject to controls.

To ensure that we can meet these special conditions, we will require full dangerous goods details prior to accepting a booking for Vancouver. We will then check with our counterparts, to see if there are any restrictions or special requirements in place.
